

2013 international conference on advanced manufacturing engineering and technologies (NEWTECH2013) will be held at KTH Royal Institute of Technology, Stockholm from 27th to 30th October 2013.

Topics

- New manufacturing technologies and advanced material processing
- Machine tool and metrology
- Metrology and integrity of machined surfaces
- Monitoring and optimization of manufacturing processes
- Functional and protective surfaces
- Nanomaterials and Nanomanufacturing
- Automation in production system
- Progress in CAD/CAM technologies
- Resource conservative manufacturing
- Sustainable production systems development
- Rapid prototyping and reverse engineering
- Assembly and manufacturing system maintenance
- Advances in modeling, analysis, and simulation of manufacturing
- Business models in relation to production system
- Supply chain management

Please find all the necessary info on the conference website <http://www.newtech2013.com>
